## BIO

Leandro García Pimentel (b. 1983) is a multidisciplinary visual artist working with painting, drawing, and installations to explore memory, absence, and the symbolic spaces within language. His work arises from the dialogue between the personal and the inherited, transforming objects and memories into poetic experiences that invite contemplation and reflection on time, loss, and human experience. With international exhibitions and inclusion in both public and private collections, his practice combines conceptual depth, visual sensitivity, and mastery of craft, constructing worlds where memory and experience become tangible.

He lives and works in Barcelona. His work has been presented in solo exhibitions including Altares Imposibles at Casa Bolívar, Buenos Aires; Composition at Leo Koo Art Gallery, Vancouver; and Preludios at the Argentine National Congress Palace. He has participated in international group exhibitions and his work is held in both public and private collections.
